[Fasteners/](#) [General Components/](#) Custom Machined Component — ISO / DIN (Series 130)

General Components · CAD Components

Custom Machined Component — ISO / DIN (Series 130) to ISO / DIN. Full dimensional table, materials, finishes and quotation. 8 sizes listed.

Technical Drawing

Customize the parameters below — every spec field is editable, and the drawing redraws to match the values you choose. Changing the size will snap the other fields to that size's standard values; you can then override any individual value.

Sends the selected values to the quote form below.

Request a Quotation for Custom Machined Component — ISO / DIN (Series 130)

Tell us the size, material, finish and quantity you need for Custom Machined Component — ISO / DIN (Series 130) (ISO / DIN) and our team will respond within one business day. Click "Request this configuration" on the drawing above to send the parameters you just chose straight into this form.

Category Type Standard Thread size Material Finish

Dimensions & Specifications (ISO / DIN)

Every row below is a starting point for the customizer above — pick any size and the drawing will redraw to that row.

Size designation	Outer diameter / width (mm)	Length / height (mm)	Bore / thread (mm)	Material	Reference standard
Size 1	10	20	6	C45 carbon steel	GB/T 1804-m
Size 2	12	25	8	C45 carbon steel	GB/T 1804-m
Size 3	16	32	10	C45 carbon steel	GB/T 1804-m
Size 4	20	40	12	C45 carbon steel	GB/T 1804-m
Size 5	25	50	16	C45 carbon steel	GB/T 1804-m
Size 6	32	63	20	C45 carbon steel	GB/T 1804-m
Size 7	40	80	25	C45 carbon steel	GB/T 1804-m
Size 8	50	100	30	C45 carbon steel	GB/T 1804-m

Custom Machined Component — ISO / DIN (Series 130) (ISO / DIN) are a type of general components used across industrial assembly. Below is the complete size table together with material, standard and application guidance.

What Are Custom Machined Component — ISO / DIN (Series 130)?

Custom Machined Component — ISO / DIN (Series 130) are general components defined by ISO / DIN. They are selected by thread size and the dimensional characteristics shown below, and are available in a range of materials and finishes to suit the application and environment.

CAD Source Reference

This page is generated from an original native CAD part model (SolidWorks .SLDPRT) of the custom machined component — iso / din (series 130) family maintained by our engineering team. The technical drawing shown above is rebuilt parametrically from the dimensional table, so it always reflects the exact size and configuration you select. Native CAD files (STEP / SLDPRP) can be supplied with your quotation on request.

Materials & Finishes

Common materials include carbon steel (typically zinc plated or hot-dip galvanized), alloy steel in property classes 8.8, 10.9 and 12.9, and stainless steel A2 (304) or A4 (316) for corrosion resistance. Specify the material, property class and surface finish appropriate to your load and environment.

Typical Applications

General machinery assemblies where a source CAD component is required for selection or quotation. [Read the full application guide for Custom Machined Component — ISO / DIN \(Series 130\) →](#)

Pricing

Custom Machined Component — ISO / DIN (Series 130) are stocked and supplied to order. Pricing starts from approximately US\$0.10 per piece for standard sizes in carbon steel; final pricing depends on size, material, finish and order quantity (MOQ applies). Submit your exact configuration with the quote form above.

Frequently Asked Questions

What is the controlling standard for Custom Machined Component — ISO / DIN (Series 130), and what drive do they take?

Custom Machined Component — ISO / DIN (Series 130) are manufactured to ISO / DIN and use the standard drive for this product family. The dimensional values on this page follow that standard.

What sizes are available for Custom Machined Component — ISO / DIN (Series 130)?

The table on this page lists 8 sizes for Custom Machined Component — ISO / DIN (Series 130), ranging from Size 1 to Size 8. Sizes outside the table can be quoted on request.

In which materials are Custom Machined Component — ISO / DIN (Series 130) supplied?

Custom Machined Component — ISO / DIN (Series 130) are supplied in carbon steel and stainless, with finishes including zinc plating, hot-dip galvanizing and black oxide. Choose material and finish to suit the load and the service environment for Custom Machined Component — ISO / DIN (Series 130).

How do I request a quotation?

Use the parametric drawing on this page to set the exact configuration (size, material, finish) and click "Request this configuration" — a specialist from engineeringhardware.com will respond within one business day.
