Threaded Rod — ISO / DIN (Series 153) to ISO / DIN. Full dimensional table, materials, finishes and quotation. 10 sizes listed.

Technical Drawing

Customize the parameters below — every spec field is editable, and the drawing redraws to match the values you choose.

Changing the size will snap the other fields to that size's standard values; you can then override any individual value.

Sends the selected values to the quote form below.

Threaded Rod — ISO / DIN (Series 153) (ISO / DIN) are a type of bolts used across industrial assembly. Below is the complete size table together with material, standard and application guidance.

What Are Threaded Rod — ISO / DIN (Series 153)?

Threaded Rod — ISO / DIN (Series 153) are bolts defined by ISO / DIN. They are selected by thread size and the dimensional characteristics shown below, and are available in a range of materials and finishes to suit the application and environment.

CAD Source Reference

This page is generated from an original native CAD part model (SolidWorks .SLDPRT) of the threaded rod — iso / din (series 153) family maintained by our engineering team, covering 3 recorded size configurations. The technical drawing shown above is rebuilt parametrically from the dimensional table, so it always reflects the exact size and configuration you select. Native CAD files (STEP / SLDPRPT) can be supplied with your quotation on request.

Materials & Finishes

Common materials include carbon steel (typically zinc plated or hot-dip galvanized), alloy steel in property classes 8.8, 10.9 and 12.9, and stainless steel A2 (304) or A4 (316) for corrosion resistance. Specify the material, property class and surface finish appropriate to your load and environment.

Typical Applications

Structural steelwork, machinery, automotive and general assembly where high-strength, removable joints are required. [Read the full application guide for Threaded Rod — ISO / DIN \(Series 153\) →](#)

Frequently Asked Questions

What standard and drive type do Threaded Rod — ISO / DIN (Series 153) use?

Threaded Rod — ISO / DIN (Series 153) are manufactured to ISO / DIN and use the standard drive for this product family. The dimensional values on this page follow that standard.

Which sizes of Threaded Rod — ISO / DIN (Series 153) does engineeringhardware.com supply?

The table on this page lists 10 sizes for Threaded Rod — ISO / DIN (Series 153), ranging from M6 to M36. Sizes outside the table can be quoted on request.

In which materials are Threaded Rod — ISO / DIN (Series 153) supplied?

Threaded Rod — ISO / DIN (Series 153) are supplied in carbon steel in property classes 8.8 / 10.9 / 12.9 and stainless A2 (304) / A4 (316), with finishes including zinc plating, hot-dip galvanizing and black oxide. Choose material and finish to suit the load and the service environment for Threaded Rod — ISO / DIN (Series 153).

How do I request a quotation?

Use the parametric drawing on this page to set the exact configuration (size, material, finish) and click "Request this configuration" — a specialist from engineeringhardware.com will respond within one business day.
